

Acorn

Rabobank

Acorn unlocks access to the voluntary carbon market for smallholder farmers who are adopting regenerative agroforestry carbon farming practices in the Global South

Marketplace & Ecosystem

Connecting corporates and farmers on the marketplace to find the best price for Acorn carbon removal units

Technology & Trust

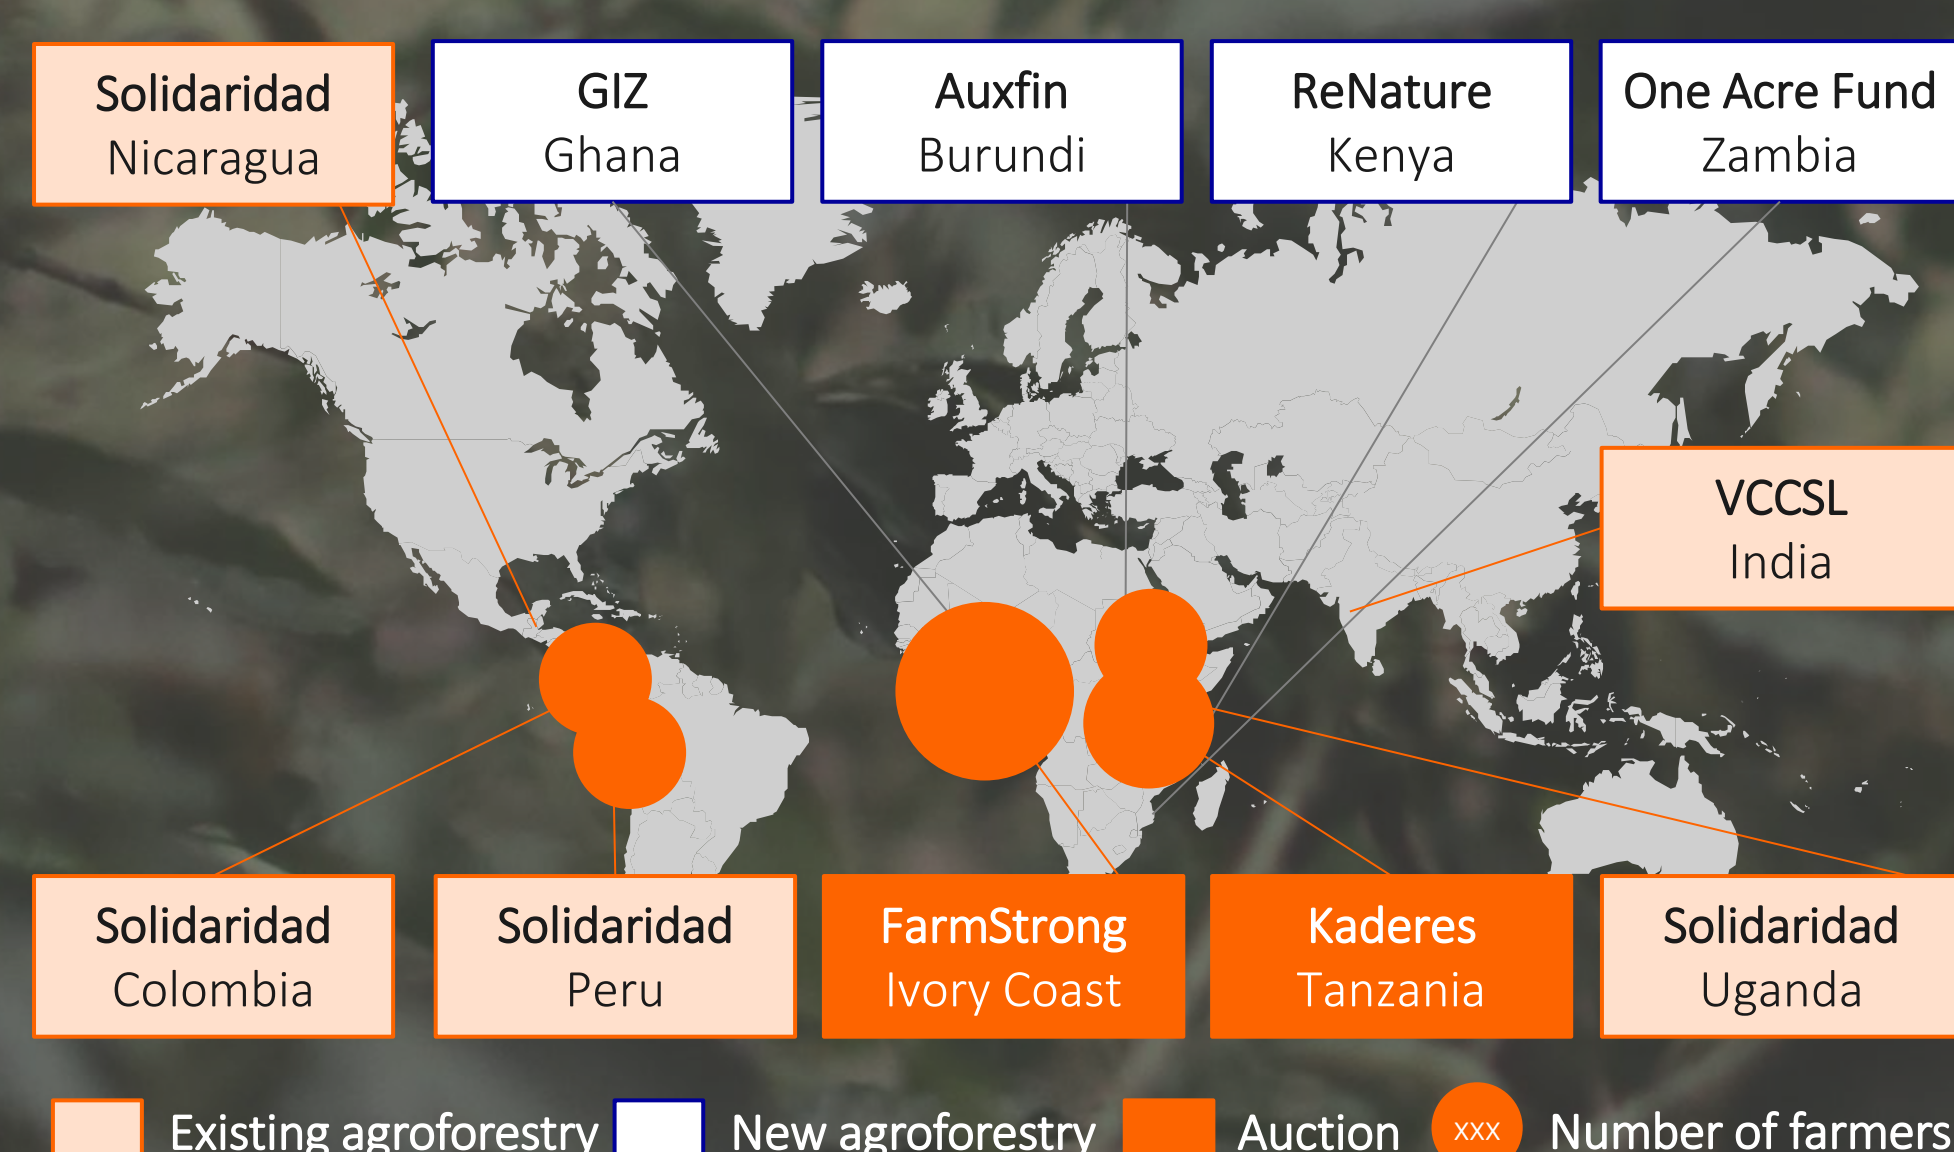

Scalable tech-driven monitoring (satellite & LiDAR data, AI & ML) based on historic and current farm data

Transparency & Quality

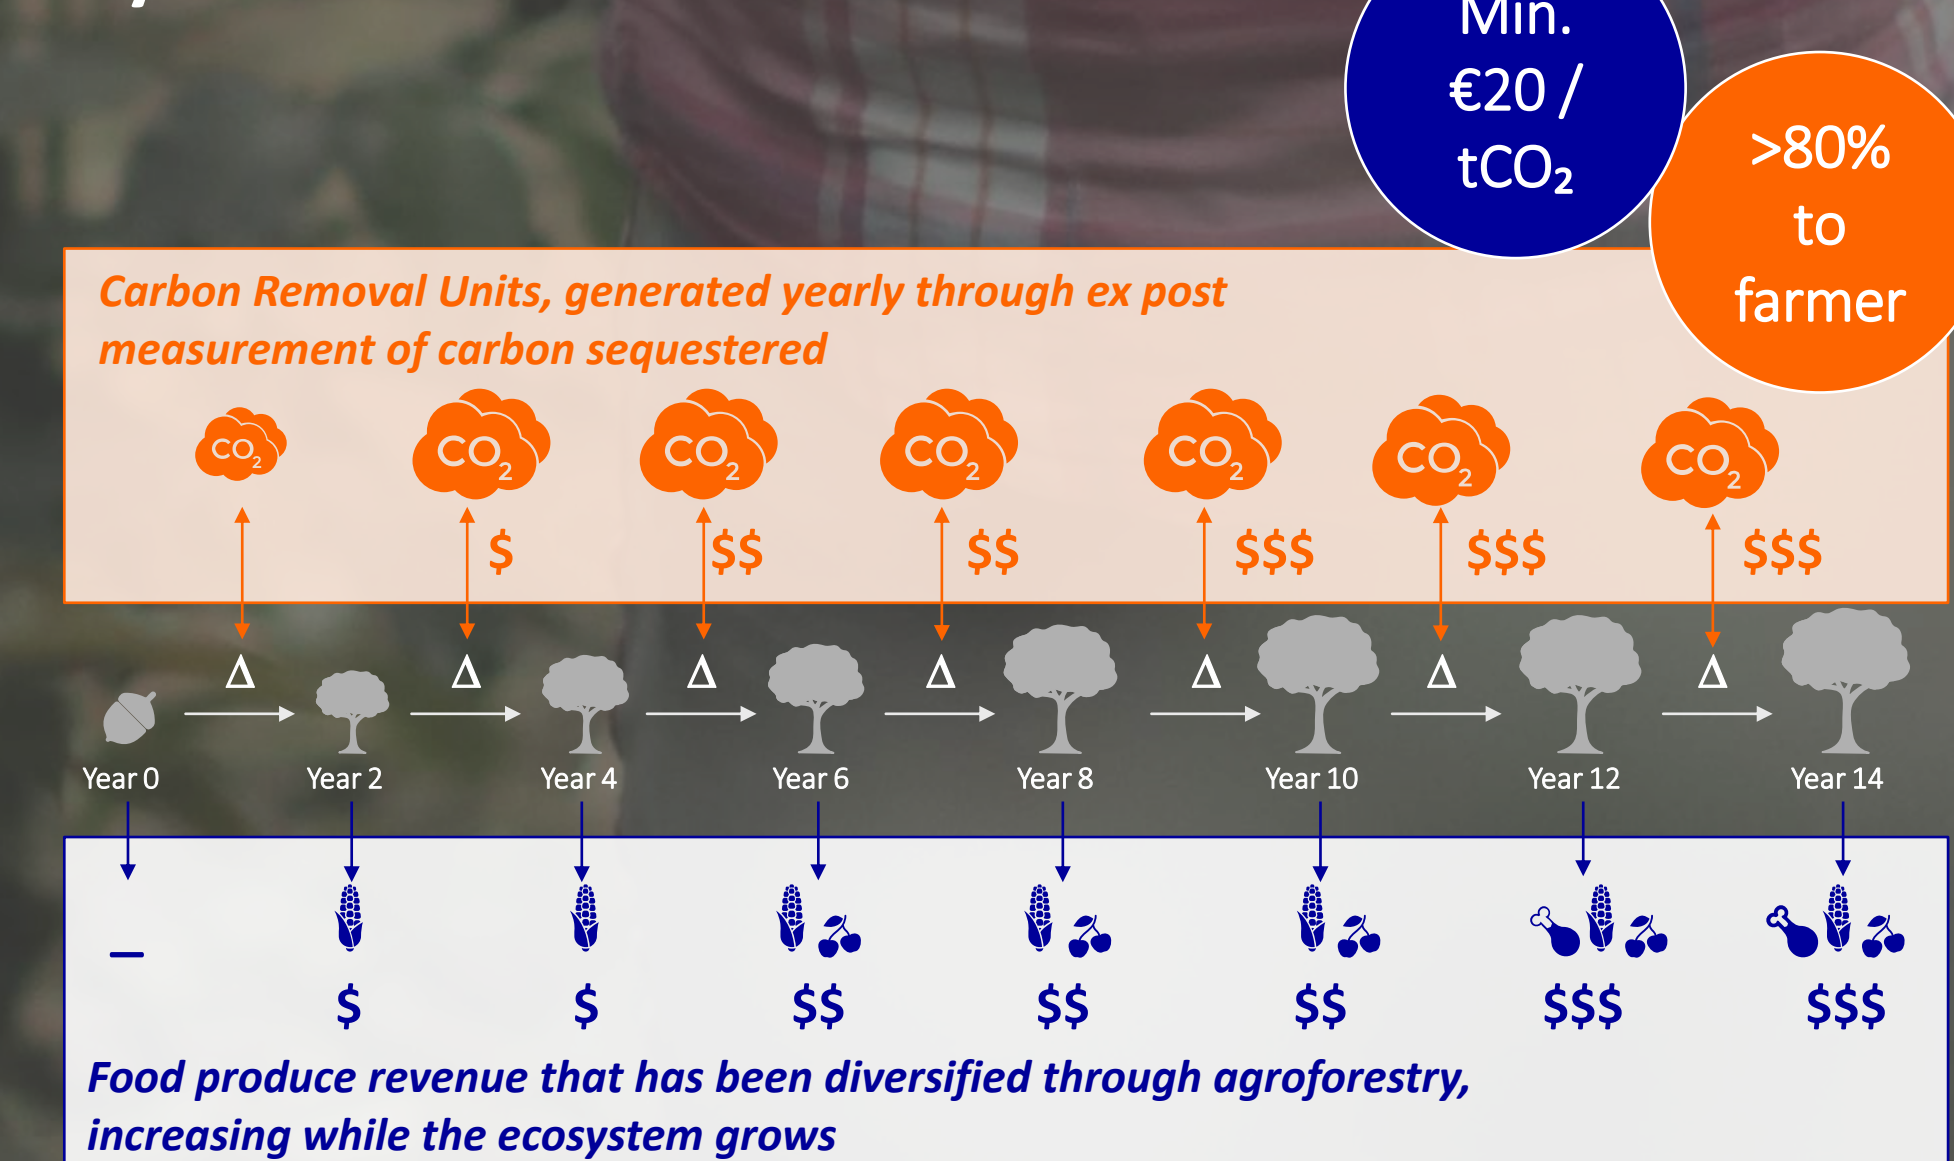

Trustworthy, low-cost, traceable & transparent certification through innovative Framework & Methodology design

Where Acorn currently operates

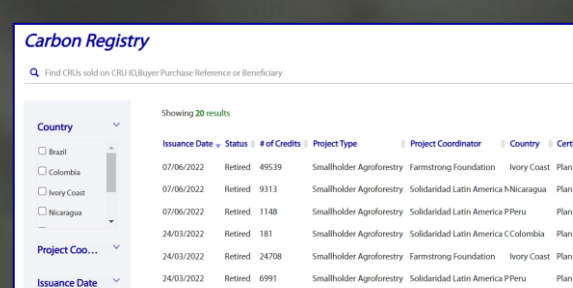

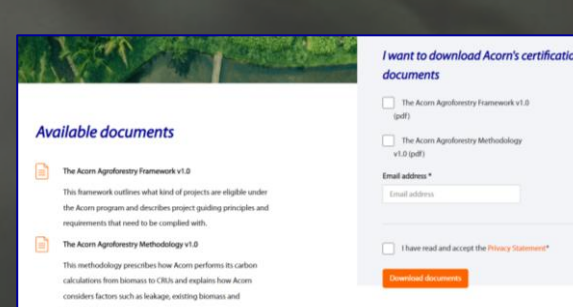

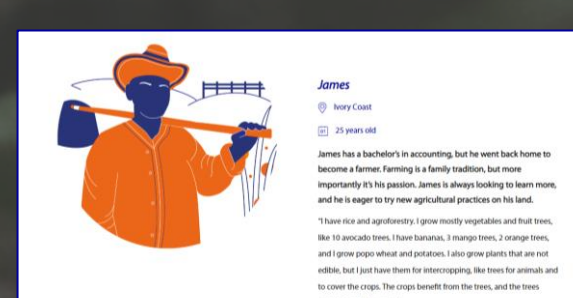

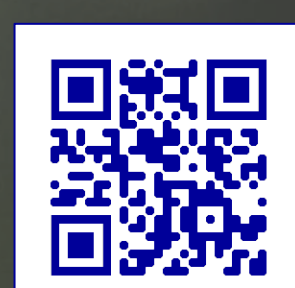

Payments to farmers

How to reach Acorn

If you follow the [blue](#) QR code you will reach acorn.rabobank.com. Here you can find the Framework & Methodology, the Acorn registry, our partners & farmers, our FAQs and different videos explaining Acorn.

If you follow the [orange](#) QR code, you will be led to Acorn's upcoming auction. Here you will find more information about the 100.000 carbon removal units, how to participate and the auction rules.

Acorn's quality definitions

- Nature based** Carbon credits originating from naturally occurring ecosystems
- Removal** CO₂ sequestered from the air into nature-based systems. NOT avoidance, reduction or allowance credits
- Ex post** Carbon sequestration that has already taken place, with a vintage of maximum 2 years. NOT a promise for the future
- Transparent** Carbon sequestered can be proven through data driven measurements and analytics
- Traceable** Complete clarity when and where carbon is removed and on payment.
- Certified** Credits are certified and verified by an independent and trustworthy external standard Plan Vivo
- Co-benefits** 80% of the sale price flows directly back to the smallholder farmer
